

Over all people are very inconsiderate and rude when it comes to phone manners. Just imagine sitting next to someone and having to listen for maybe hours. There is no place to escape the noise on an airplane. This is not the place for phone conversations. I hear from passengers everyday I fly and they are very concerned about having to listen to someones conversation for hours. This is really not a good idea. Can't people turn it off for awhile? Thanks for taking my comment-PLEASE DON'T OK CELL PHONE USE ON AIRBORNE AIRCRAFT!!!
